

“Where will our knowledge take you?”

## Contract and Commercial Management

“ **BMT JFA Consultants has significant expertise in the development and delivery of ports, harbours, channel and coastal management, including capital and maintenance dredging.** ”

The frequent and diverse interaction with clients, contractors, specialists and suppliers gives BMT JFA proficiency in contract procurement, management and financial control. This allows us to advise our clients on the best strategy to bring their projects to fruition, backed up with their experience in contractor evaluation and selection.

BMT JFA provides contract management services from project feasibility studies, front end engineering and detailed design through to capital works completion. These services include: the procurement and selection of contractors and specialists for site investigations; procurement of suppliers for specialist services, such as wave monitoring and port simulation studies. BMT JFA also manages specialist designers and contractors for the delivery of capital works from dredging, seawall, berth to wharf construction.

BMT JFA also provides experienced site supervisors, supported by project managers and contract engineers. Our experienced contract

management team works within a controlled contractual environment focused on mitigating contractual risks.
