

“Where will our knowledge take you?”

Other Services

Expert Witness and Peer Review

“ BMT JFA has provided a range of services including expert witness, expert advice on claims and peer reviews for a diverse range of clients, including regulatory authorities, financial organisations, potential investors and local, state and federal institutions. ”

With our detailed technical understanding in the fields of port and harbor engineering, the BMT JFA team includes many engineers recognised in the industry as leading experts in their respective fields of expertise. With particular experience in the fields of capital and maintenance dredging, coastal engineering, seawall/breakwater design and construction, marine development site selection, site (geotechnical, geophysical, survey) investigations, jetty structures and overall maritime engineering experience, BMT JFA are able to add considerable value and provide independent and impartial technical input and advice, as required.

In particular, BMT JFA has developed specific expertise in the field of exploded and unexploded ordnance (EXO & UXO) which exists at both operational and planned port developments in Australia and overseas. BMT JFA is able to provide particular input and

advice in order to deal with such issues should they be of concern.
